

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office
FLOOR DEBATE

March 21, 2002 LB 946, 1085

information, for one thing. But we ought to look at it from that perspective, not from the perspective of a budget crisis. I do think that although the Governor's direction was misguided, that he did identify something that we should do, and that is to make business a part of the solution. I don't think making LB 775 is a...is a right way to make business part of the solution. But they should be a part of the solution. What are the components of our solution? The Revenue Committee has recommended a cigarette tax, I don't know what we'll do with that, but that's not making business a part of the solution, particularly. LB 775 is going to be out, so business won't be that part of the solution. Some people, and I think the lobby has taken an interest in a temporary..."temporary" sales tax hike. But I don't see that, and I don't think the Governor would look at that as business involvement in the solution. So there's one element left where we really have an opportunity to engage business in a positive sort of way and make them a part of the solution, and that is that portion which is Senator Brashear's, ironically, contribution to the solution, which is the broadening of the sales tax base. We will have an opportunity to look at that when LB 1085 comes up tomorrow, or the next day. And depending on what categories or components you would add, or put into a sales tax base solution, there's the opportunity to say, business, make your contribution. And I would think that a grateful business, if LB 775 is salvaged out of all of this, unscathed, I would think they would be cooperative on that point. As I understand their position, it is we do want to be part of the solution, but we want to be part of it in a perspective, prospective, fair way that let's our people know that this is what it's going to be in the future. So, it would...I...I would hope that the Legislature would look that way and that we could find a place for business contribution in that aspect of our solution. But it does seem misguided to me to try to engage them in the solution with...with this particular suggestion. Thank you.

SPEAKER KRISTENSEN: One minute. Senator Erdman.

SENATOR ERDMAN: Thank you, Mr. Speaker. Members, it's now time to hear about a little town called Sidney. This is testimony from our city manager there. If you drove through Sidney,
